

# Auto TOC

Starting in Tiki12, a new feature to allow adding an automatic Table Of Contents ("Auto TOC") has been added to the Wiki. And starting in Tiki23, you can have more options via PluginAutoTOC

# Enable it

Auto-toc can be enabled as admin through the admin panel in "**Admin home > Wiki > General Preferences (Tab) > Section *Automatic table of contents* (Page Display before Tiki 15) > Wiki auto-toc**"

You can also choose:

- the default for each page (which can be overridden per page)
- If the top TOC should be inserted into the page content or not
- Position left or right
- Offset from the top

Automatic table of contents

Wiki auto-toc	<input checked="" type="checkbox"/> ? ↺
Table of contents default	<div>Off</div> <div>i ↺ ✓</div>
Inline auto-toc	<input checked="" type="checkbox"/> i ↺ ✓
Table of contents position	<div>Right</div> <div>i ✓</div>
Table of contents offset	<div>10</div> <div>i ✓</div> <div>pixels</div>

Click to expand

Auto TOC is not included in the print view of the page.

# Usage

Auto-toc will add the TOC in two places.

1. A static TOC located at the top of the page. The TOC is inserted into the page content at runtime.

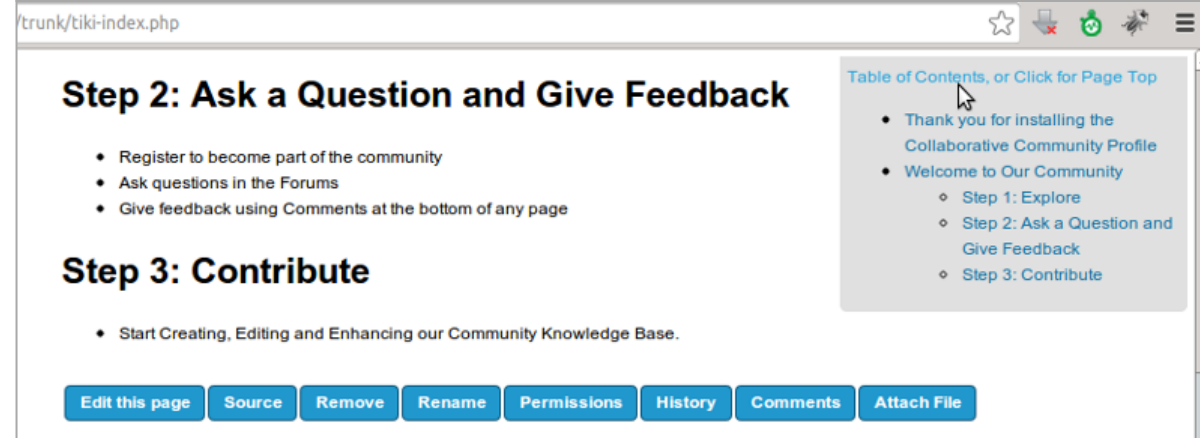

• Example:

Click to expand

2. A floating TOC, located at the top of the browser window. This TOC is only visible when you scroll down past the top of the page.

• Example:

Click to expand

Additionally, you can also see it in action in the screencast below.

```
{flash type="url" movie="https://dev.tiki.org/display372" width="550" height="500"}
```

# Disable it in some pages

You can disable it in some wiki pages. In order to do so, edit the page, go to the properties tab, and set "**Page display options > Automatic Table of Contents generation**" to "**off**":

## Edit: HomePage

The screenshot shows the 'Edit: HomePage' interface with the following elements:

- Tabs:** 'Edit page' (active), 'Properties', and 'No Tabs'.
- Apply template:** A dropdown menu set to 'none' with a link to 'Admin Content Templates'.
- Upload file:** A section with a button 'Selecciona el fitxer', a text input 'Cap fitxer seleccionat.', a 'Comment:' label, and an 'Attach' button.
- Language:** A dropdown menu set to 'English (en)' with a note: 'To translate, do not change the language and the content. Instead, [create a new translation](#) in the new language.'
- Page display options:** A section containing two items:
  - 'Automatic Table of Contents generation' set to 'Off' (highlighted with a red rectangle).
  - 'Show page title' with a dropdown arrow.
