

Import Trackers

There are several ways to import a tracker, its fields and its data:

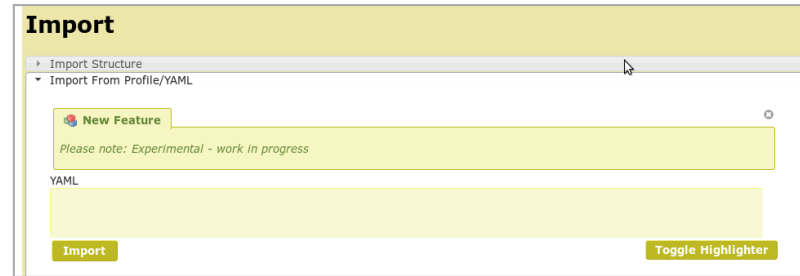

1st Way: Import Tracker using its structure (own code)

The screenshot shows the 'Trackers' application interface. At the top, there's a header with the 'Trackers' logo and a user profile icon. Below the header, there's a navigation bar with tabs: 'Trackers', 'Duplicate/Import Tracker', and 'No Tabs'. The main content area is divided into two sections: 'Duplicate Tracker' and 'Import'. The 'Duplicate Tracker' section has a 'Name' input field, a 'Tracker' dropdown menu (currently showing 'Dynamic tracker example'), and two checkboxes: 'Duplicate categories' and 'Duplicate permissions'. Below these is a 'Duplicate' button. The 'Import' section has a collapsed 'Import Structure' dropdown, a 'Raw data' input field, a 'Preserve tracker ID' checkbox, a 'Note' box with the text 'Use "Tracker -> Export -> Structure" to produce this data.', and an 'Import' button.

2nd way: Import Tracker using Profile/Yaml code

Click to expand

Export and Import of Tracker Fields

On the **Edit Fields** page (/tiki-admin_tracker_fields.php?trackerId=) you need to select all fields you want to export with the checkboxes, then at the bottom there is a dropdown where you select **Export Selected**.

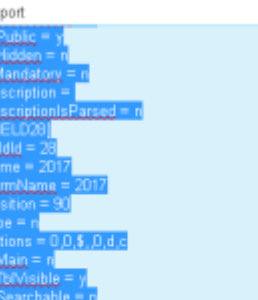

The screenshot shows the 'Edit Fields' page for a tracker. At the top, there are buttons: 'Edit This Tracker', 'Edit Fields', 'Trackers', and 'View Items'. Below these are tabs: 'Trackerfields' and 'Import Tracker Fields'. The main content is a table with columns: ID, Name, Type, List, Title, Search, Public, Mandatory, and Action. All fields are selected with checkboxes. At the bottom, there is a dropdown menu with 'Export Selected' selected, and a 'Go' button.

☒	ID	Name	Type	List	Title	Search	Public	Mandatory	Action
☒	20	Area	Drop Down	☒	☒	☐	☒	☒	☒
☒	21	Equipment	Text Field	☒	☐	☐	☒	☒	☒
☒	22	Description	Text Area	☒	☐	☐	☒	☐	☒
☒	23	Estimated Costs	Computed Field	☒	☐	☐	☒	☐	☒
☒	24	2013	Numeric Field	☒	☐	☐	☒	☐	☒
☒	25	2014	Numeric Field	☒	☐	☐	☒	☐	☒
☒	26	2015	Numeric Field	☒	☐	☐	☒	☐	☒
☒	27	2016	Numeric Field	☒	☐	☐	☒	☐	☒
☒	28	2017	Numeric Field	☒	☐	☐	☒	☐	☒

Export Selected

- Save All
- Remove Selected
- Export Selected

This will open a window with the code you need to copy, then paste in to the **Import Tracker Fields** tab.

Export

isPublic = y
 isHidden = n
 isMandatory = n
 description =
 descriptionIsParsed = n

Import

Import Tracker data

To import data, you can import data through the other interface:

Click to expand

In order to get the right syntax for the file, you can export your tracker data first, so that you can see an example of how columns are data are formatted. See [Export Trackers](#).

Use from remote sources

You can alternatively use tracker data from remote sources through the **ODBC** read/write support added in Tiki23.
