

Timesheet

Added in Tiki9, Timesheet allows to track time spent on different tasks and projects. It uses a special jQuery plugin called jTrack, which allows to have time counters on even if the user closes the browser or logs out for some reason. It is a very useful feature for project management, in which workers are expected to record the time spent on different tasks.

More information to come... stub

The screenshot displays the Tiki9 Timesheet interface. At the top, the Tiki Wiki CMS Groupware logo is on the left, and a 'LOG OUT' button is on the right. Below the logo, a 'Menu' sidebar lists various options: Home, Wiki, File Galleries, Spreadsheets, Trackers, Admin, and TimeSheet (highlighted). The main content area features a 'Time Tracker' tab, with sub-tabs for 'Local Cache (Not Committed)' and 'Saved (Committed)'. The 'Time Tracker' tab is active, showing a list of tasks with columns for date, description, and time. The tasks are as follows:

Date	Description	Time
14.10.2011	testing timesheet from robert in trunk	0:08:48
14.10.2011	Email	1:01:35
14.10.2011	Another email box tralari-tralara through thunderbird also	0:03:59
14.10.2011	screenshotting timesheet for robert and marc	0:00:00

Each task entry includes 'Edit' and 'Delete' links and a power icon. The interface also includes a 'New task | Delete all' button and checkboxes for 'C' and 'A' at the top of the task list.
