

User Preferences

The User Preferences page is where the user can set his or her personal preferences for the site: user name, photo, time zone, theme, language, etc. The preference options at any particular Tiki site may differ from those described here, depending on which options the site administrators have activated. Also, these are personal settings and shouldn't be confused with the general site-wide Preferences that the site administrators configure.

Navigating to the User Preference page

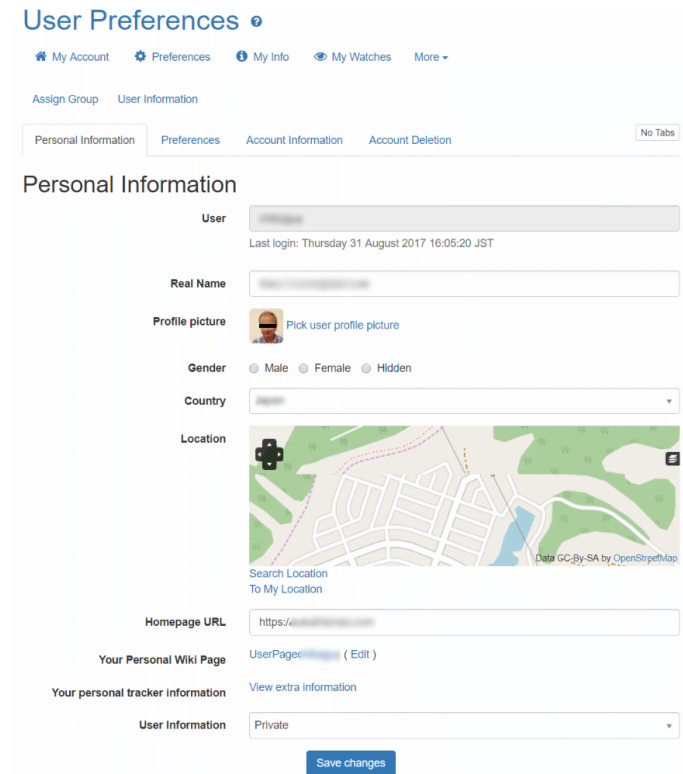

If enabled from the admin menu, you will see a link to user **MyAccount > Preferences** in the application menu (if this menu is activated). This page, located at `tiki-user_preferences.php`, is for registered users (users logged in at the site) where they can set a number of personal preferences about the site, and where they can see some statistics and links to pages, blogs or galleries, etc. they have created.

The user can change his or her email, visual theme, indicate his or her real name, homepage, and find a link to access a personal wiki page as well as a link to edit the page.

Personal Information tab

Note:

When using some types of external authentication (such as LDAP Authentication), the user's preferences may not be updatable from within Tiki. You will need to make changes to the host authentication system.

The screenshot shows the 'User Preferences' page in Tiki. At the top, there's a navigation bar with links: 'My Account', 'Preferences', 'My Info', 'My Watches', and 'More'. Below this, there's a sub-navigation bar with 'Assign Group' and 'User Information'. The main content area is titled 'Personal Information' and contains several fields for user data. The 'User' field is a text input with a dropdown arrow. Below it, the 'Last login' time is displayed as 'Thursday 31 August 2017 16:05:20 JST'. The 'Real Name' field is a text input. The 'Profile picture' section shows a small profile picture and a link to 'Pick user profile picture'. The 'Gender' field has three radio buttons: 'Male', 'Female', and 'Hidden'. The 'Country' field is a dropdown menu. The 'Location' field features a map with a location pin and a link to 'Search Location To My Location'. The 'Homepage URL' field is a text input. Below this, there's a section for 'Your Personal Wiki Page' with a link to 'UserPage' and an '(Edit)' link. The 'Your personal tracker information' section has a link to 'View extra information'. The 'User Information' field is a dropdown menu set to 'Private'. At the bottom, there's a 'Save changes' button.

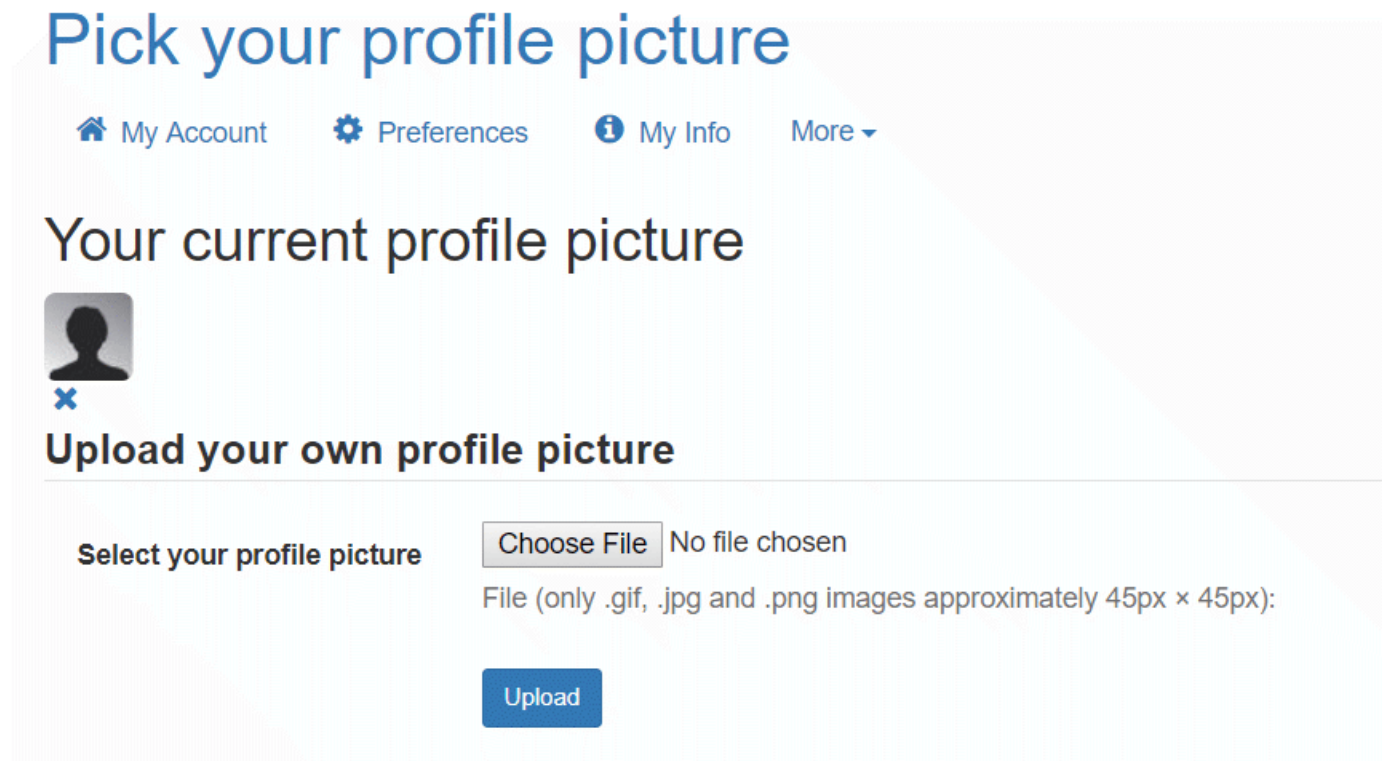

Under this tab, the following information can be viewed and edited:

- User (the user name at the site)
- Real name (There is a global option to use real names where possible throughout the site.)
- Profile picture (see below)

- Country (choose from a list)
- Location (see below)
- Homepage URL (Users with an external website can enter the information here.)
- Your personal wiki page (This page name is generated automatically; each user is the admin of this page.)
- User information (private or public)

User profile picture

The "Pick user profile picture" link ("My Account > Preferences (Personal Information tab) > Pick user profile picture", **tiki-pick_avatar.php**) enables the user to select an image to represent him or her at the site:

The screenshot shows a web interface for selecting a profile picture. At the top, there's a navigation bar with links: "My Account" (home icon), "Preferences" (gear icon), "My Info" (person icon), and "More" (dropdown arrow). Below this, the main heading is "Pick your profile picture". Underneath, it says "Your current profile picture" and shows a placeholder image of a person's silhouette with a blue 'x' below it. Below that is the section "Upload your own profile picture". This section contains a "Select your profile picture" label, a "Choose File" button, and the text "No file chosen". Below these is a note: "File (only .gif, .jpg and .png images approximately 45px x 45px):". At the bottom of this section is a blue "Upload" button.

To set relevant settings globally (for all site users), the site administrator can configure, on the "User Settings" admin page, under the "User Info and Picture" tab, the following options:

- Use Gravatar for user profile pictures
- Store full-size copy of profile picture in file gallery
- Size of the small profile picture stored for users (defaults to 45 pixels)
- Crop the profile picture thumbnail to a square
- File gallery in which to store full-size profile picture
- File ID of default profile picture

Location

The user's geographical location can be shown on a map; this uses the open source OpenLayers technology. To set the location, the link "Search location" will open a search form to enter the user's local address and generate the coordinates for the map location.

Preferences tab

This screen can be used to set up different themes for users. Basically all the Preferences that can be set at the user level can be found in this screen.

The screenshot shows the 'User Preferences' interface. At the top, there's a navigation bar with 'My Account', 'Preferences' (selected), 'My Info', 'My Watches', and a 'More' dropdown. Below this is a sub-navigation bar with 'Assign Group', 'User Information', 'Personal Information', 'Preferences' (selected), 'Account Information', and a 'No Tab' button. The main content area is titled 'Preferences' and contains several sections: 'General settings' with options for 'Is email public?' (set to 'no'), 'Email character set' (set to 'utf-8'), 'Theme' (set to 'Default Bootstrap'), 'Language' (set to 'English (en)'), 'Number of visited pages to remember' (set to '1'), and 'Displayed timezone' (set to 'Detect user time zone'). 'User Messages' section includes 'Messages per page' (set to '10'), 'Message priority notification' (set to '1-Lowest'), and 'Read message auto-archiving' (set to 'never'). 'User Tasks' section has 'Tasks per page' (set to '2'). 'My Account' section lists various user items like 'My pages', 'My blogs', 'My messages', 'My tasks', 'My forum topics', 'My forum replies', 'My user items', and 'My articles', with a 'My level' dropdown set to 'Simple'. At the bottom, there are checkboxes for 'Keep closed remarkbox hidden' and 'Remember which remarkbox (alert box) you have closed and don't show them again.', a 'Reset remark boxes visibility' button, and a 'Save changes' button.

Configuration options under this tab include:

General options

- Is email public? (If email is public, select a scrambling method to prevent spam)
- Email character set (Special character set for your email application)
- Theme (if the site admin has enabled individual users to select a visual theme)
- Language
- Can you read more languages? (links to a form to select other languages; translations of pages, etc. may be available)

- Number of visited pages to remember
- Displayed time zone
- Detect user time zone if browser allows, otherwise site default
 - Use 12-hour clock in time selectors
 - Display info tooltip on mouseover for every user who allows his/her information to be public

User Messages

- Messages per page
 - Allow messages from other users Notify sender when reading his mail
 - Message priority notification (Send me an email for messages with priority equal to or greater than 1 - 5, or none)
- Read message auto-archiving (Auto-archive read messages after selected number of days)

User Tasks

- User Tasks per page

My Account (feature items to include in reports of my activity)

- My pages
- My blogs
- My messages
- My tasks
- My forum topics
- My forum replies

- My user items
- My articles

My level

- My level (simple or advanced) — to choose whether or not to see "advanced" links in menus, as designated by the menu author; could be useful in some contexts.

(About contextual remarks boxes, or alerts)

- Keep closed remarks boxes hidden
- Remember which remarks boxes (alert boxes) I have closed and don't show them again.
- Reset remark boxes visibility

Account Information tab
