

## 모바일

모든 티키 기반의 사이트들은 WAP 활성화된 모바일 전화기 혹은 PDA 포켓 브라우저를 통하여 브라우징이 될 수 있는 기능을 보유하고 있습니다. 이 기능은 [jQuery](#) 에 기반한 신 기술을 사용하여 [Tiki7](#) 에서 향상되었습니다.

## Tiki7 이후

Tiki7 에서부터, 모바일 버전은 [jQuery 모바일](#) 과 [MobileESP](#) 의 기능을 활용하고 있습니다.

Apply the [Mobile profile](#) to use. This profile will create a minimal perspective that will allow you then to use a special home page, menus etc just for mobile. All features of Tiki (login, etc.) are expected to work well over time.

Then go to the site on a mobile device and it automatically (should) kick in (i.e. it switches to the mobile perspective and mobile theme which adds the jquery.mobile libraries & css).

Alternatively, you can click the "**switch to mobile**" link on the mobile module the profile adds for you.

## How to enable/disable mobile mode

Tiki will automatically change the display mode to mobile when a mobile device is detected. You can in addition change to mobile mode or return to standard display mode manually with the side module for Mobile (created automatically when you apply the Profile Mobile to your Tiki site).

Module in a side column

# Improved in Tiki12

Mobile mode display has been extensively improved in [Tiki12](#). See as an example this page Mobile displayed in standard mode:

The screenshot shows a desktop browser window displaying the Tiki Documentation site. The URL is [doc.tiki.org/Mobile](http://doc.tiki.org/Mobile). The page title is "Documentation: How to set up and use Tiki". The main content area is titled "Mobile" and contains a "Keywords" section with a list of terms like Accessibility, Accounting, Articles and Submissions, Backlinks, Banners, Blog, and Bookmark. A note at the top left says: "This page is to document 'what Tiki does'. For 'what Tiki should do', please see corresponding page on dev site." Below the note are several icons for different mobile devices. The navigation bar at the top includes links for INFO, DOC, DEV, COMMUNITY, THEMES, PROFILES, SUITE, CHAT, DEMO, and REGISTER. On the left, there's a sidebar with links for FEATURES, REQUIREMENTS, DOWNLOAD, INSTALL, BACKUP, UPGRADE, and HELP.

Click to expand

And the same page displayed for mobile devices:

The screenshot shows the same page from the previous image, but it is displayed in a mobile browser window. The interface is much more compact and simplified. The "Mobile" section is still present, but the "Keywords" list is gone. The note about the difference between "what Tiki does" and "what Tiki should do" is also missing. The navigation icons for mobile devices are still present, along with the standard Tiki navigation bar at the top.

## Until Tiki 6 LTS

Until Tiki6LTS, this is thanks to the power of the HAWHAW library. This is currently limited to Wiki pages, Articles and Forums. Other Tiki areas and authentication are not supported. You can see in either small font size or magnified version:

Small font size

Magnified font size

You can follow its development on this dedicated Mobile Tiki website:
