

Working with Views

Please read the documentation of [the Mapserver](#) and read the [Maps Mapfile Tutorial](#) if you need to learn the basics of a Mapfile.

Creating Views

Specifying the View

The VIEW must be used as VIEW1,VIEW2,VIEW(n)...VIEW30. Followed by a location id/location name and the extents in double quotes.

```
%%  
VIEW1 "location id, "  
VIEW2 "location id, "  
VIEW3 "location id, "  
...  
...  
VIEW30 "location id, "  
/%%
```

Set View Extents

Get the map extents for the view you want to display and set the minx, miny, maxx, maxy values inside the double quotes " " separated by comma ','.

```
%%  
VIEW1 "location id,minx,miny,maxx,mxy"  
/%%
```

Adding in the Views

A Mapfile contains a WEB object. Inside the WEB object the METADATA keyword can be used to store your views and close it with an END. You can have up to a maximum of 30 views.

```
%%
```

Start of web interface definition

```
WEB
...
....
.....
METADATA
VIEW1 "location id,minx,miny,maxx,maxy"
VIEW2 "location id,minx,miny,maxx,maxy"
VIEW3 "location id,minx,miny,maxx,maxy"
....
...
VIEW30 "location id,minx,miny,maxx,maxy"
END
....
...

END
/PP
```
