Tiki

Tiki Manager gets Tiki Source code from <https://gitlab.com/tikiwiki/tiki>

Sending email

By default, Tiki will use the server's sendmail (via PHP). If this is not configured, please see: [SMTP](#)

Others

There is a call to Google Chart API to make a pie chart in the performance admin panel (the byte code cache tab of the `tiki-admin.php?page=performance`). Ex.:

<https://chart.googleapis.com/chart?cht=p3&chs=250x100&chd=t%3A0.76%2C0.24&chl=Used%7CAvailable&cht=Memory>
todo: replace this by a Tiki generated pie chart fixed in 18.4 and 19.2
